

Material Safety Data Sheet (MSDS)

R8.71 HIV-1 RCL Positive Control Virus

1. Product Identification

Product Name: R8.71 HIV-1 RCL Positive Control Virus

Product Type: Attenuated HIV-1-Derived Control Material

Intended Use: Research Use Only (RUO)

Manufacturer: Virongy Biosciences

Recommended Use: Replication Competent Lentivirus (RCL) assay development, qualification, and quality control workflows.

2. Hazard Identification

This material contains HIV-1-derived viral components and should be treated as potentially biohazardous material.

Potential Hazards:

- Exposure to infectious or recombinant biological material
- Risk of accidental laboratory exposure through aerosols, sharps, or mucosal contact

This material is intended for use only by trained personnel operating in appropriately equipped laboratories.

3. Composition / Information on Ingredients

Component: Attenuated HIV-1-derived control virus preparation

Formulation Buffer: Proprietary buffered cell culture medium

Storage Matrix: Frozen biological preparation

4. First Aid Measures

Skin Contact: Wash thoroughly with soap and water.

Eye Contact: Flush eyes with water for at least 15 minutes.

Inhalation: Move exposed person to fresh air.

Ingestion: Seek medical advice immediately.

Exposure Incidents: Follow institutional exposure control procedures and report incidents immediately.

5. Fire Fighting Measures

Non-flammable biological material. Use extinguishing methods appropriate for surrounding fire conditions.

6. Accidental Release Measures

Wear appropriate PPE including gloves, lab coat, and eye protection.

Decontaminate spills using freshly prepared 10% bleach or equivalent approved disinfectant.

Dispose of contaminated materials according to institutional biosafety procedures.

7. Handling and Storage

Handle using Biosafety Level 2 (BSL-2) or enhanced BSL-2 practices appropriate for HIV-derived materials.

Use certified biological safety cabinets during handling procedures that may generate aerosols.

Store at -70°C or below.

Shipments should remain frozen on dry ice.

8. Exposure Controls / Personal Protection

Recommended PPE:

- Disposable laboratory gloves
- Protective laboratory coat or gown
- Safety glasses or face protection
- Additional PPE based on institutional risk assessment

Engineering Controls:

- Certified Class II biological safety cabinet
 - Appropriate biohazard waste disposal systems
-

9. Physical and Chemical Properties

Appearance: Frozen liquid preparation

Color: Variable depending on formulation

Odor: Not determined

Solubility: Aqueous biological preparation

10. Stability and Reactivity

Stable under recommended frozen storage conditions.

Avoid repeated freeze-thaw cycles.

11. Toxicological Information

No toxicological profile established. Material should be handled as potentially infectious biological material.

12. Disposal Considerations

Dispose of all waste materials in accordance with institutional biosafety procedures and applicable local, state, and federal regulations.

13. Transport Information

Ship on dry ice in accordance with applicable regulations governing biological materials and infectious substances.

14. Regulatory Information

Research Use Only (RUO). Not intended for use in diagnostic procedures, therapeutic applications, or human administration.

15. Biosafety Requirements

This product is intended only for qualified laboratories with appropriate biosafety training and approvals for handling HIV-derived materials.

Users should:

- Operate under BSL-2 or enhanced BSL-2 conditions
 - Ensure personnel receive bloodborne pathogen and lentiviral biosafety training
 - Follow institutional biosafety committee (IBC) requirements where applicable
 - Utilize proper PPE and engineering controls
 - Decontaminate and dispose of materials appropriately
-

16. Disclaimer

The information provided in this document is believed to be accurate and is supplied for guidance purposes only. Users are responsible for determining the suitability of this material for their intended applications and for compliance with all applicable regulations.
